

CASE STUDY

PINGAL EKKA

STUDENT

PARAMVEER ALBERT EKKA SCHOOL

Pingal Ekka studies in class 7 at Albert Ekka Paramveer School. Pingal tells that earlier he used to abuse and had developed other bad habits. He did not find any interest in sports or academics. But after Monkey Sports intervention, he has started to participate in sports and other co-curricular activities organized in school. Most importantly he has left all his bad habits. Pingal says that he enjoys attending school now and likes to play football and cricket.

Pingal also says that he has learnt several things because of monkey sports and wants to implement these little learning in daily life to achieve his dreams.

Three years back his uncle brought him from his village so that he could receive a quality education. His Uncle tells that Monkey sports training has helped Pingal in his physical development. His daily habits has improved and now he enjoys academics, sports and even doing household chores. I want to thank the Principal of school and the Monkey sports trainer. I am optimistic about Pingal's future as we are not just getting a good student but also a good child.

Pingal's class teacher Bhairavi Kumara Mehto, has been teaching in the school for last six years and says that the environment is very open as compared to other schools. She has always learnt from the children as well. She continued to assert that the children of this school could not get the conducive environment at their homes while playing which they get here after the intervention of Monkey Sports. The attendance of students has improved rapidly and now children look very eager to go to the playground. The enthusiasm can be well seen as the students keep on asking about Ravi Sir's (Monkey sports trainer) arrival during breaks.

BHAIRAVI MAHTO
